Hiring Manager
CoDev - Cebu City

Dear Hiring Manager,

I am writing to express my interest in the Website Fulfillment Team Member position at CoDev. I am a Bachelor of Science in Information Technology graduate from Caraga State University – Cabadbaran Campus with hands-on experience in website development, quality assurance testing, system documentation, and technical support.

Throughout my academic projects and internship experience, I have worked on developing and improving web-based applications using HTML, CSS, PHP, Laravel, JavaScript, TypeScript, Next.js, and MySQL. These experiences helped me develop strong attention to detail in implementing website features, managing content, validating functionality, and ensuring that systems meet requirements.

During my internship, I assisted in software deployment, performed QA testing and issue validation, collaborated with developers to improve system functionality, and contributed to frontend and backend enhancements. I gained experience following structured processes, documenting tasks, identifying issues, and providing feedback to improve system quality.

I am a highly organized and detail-oriented individual who takes pride in delivering accurate and reliable work. I am comfortable working independently, following written procedures, and adapting to new tools and workflows. My technical background allows me to quickly understand website structures and perform updates, content adjustments, and quality checks effectively.

I would appreciate the opportunity to contribute to CoDev by supporting website fulfillment projects and helping deliver high-quality website experiences for clients. Thank you for considering my application. I look forward to discussing how my skills and experience can support your team.

Sincerely,

JOHN REY EXCEL B. REMENTIZO
